Professional Summary

Product engineer with 8 years shipping iOS apps and SDKs. At Esri, I build AR and VPS capabilities, prototype new features, and manage releases for the ArcGIS Maps SDK for Swift. Previously built retail commerce and POS apps at PredictSpring (acquired by Salesforce) and consumer apps at DYNAMIT (acquired by TELUS). CS degree from Columbia.

Education

Columbia University

Bachelor of Arts in Computer Science

Completed degree as working professional after 4 years in industry, Federal Work-Study program.

New York, NY

May 2021 - May 2025

Experience

Product Engineer

Esri

Intern (May-Aug 2024), Full-time (June 2025-Present)

May 2024 - Present

Redlands, CA

- Rapidly prototyped new ArcGIS Maps SDK for Swift features, validating APIs and UX before release
- Developed Visual Positioning System (VPS) capabilities for high-accuracy device localization in AR
- Managed SDK version releases, coordinating API updates, sample migrations, and release validation
- Maintain open-source SDK samples: github.com/Esri/arcgis-maps-sdk-swift-samples

Freelance iOS Developer

Various Clients

May 2021 - May 2023

New York, NY

- Built custom iOS apps and advised on mobile architecture for small businesses and startups

Senior Software Engineer

PredictSpring Inc. (Acquired by Salesforce)

May 2019 - April 2021

Los Altos, CA

- Engineered mobile commerce platform serving 500K+ DAU for Fortune 500 retailers incl. Lulus and Skechers
- Integrated POS hardware via Bluetooth/IP, increasing in-store checkout speed and reliability
- Shipped iPadOS POS for SuitSupply ([press release](#)) and Toys “R” Us ([launch post](#))

iOS Engineer

DYNAMIT Technologies (Acquired by TELUS / WillowTree Apps)

April 2018 - March 2019

Columbus, OH

- Built modular, testable iOS apps with cross-functional teams
- Built CI/CD pipelines (Fastlane, Jenkins); integrated Fabric/Crashlytics for QA and crash diagnosis
- Shipped consumer apps with 100K+ downloads: [Donatos Pizza](#) and [Allergan Brilliant Distinctions](#)

Projects

DirectReport | Full-stack app (Flask + React + OpenAI)

github.com/chriswebb09/DirectReport

- Built responsive dashboard with LLM-powered reporting via OpenAI and HuggingFace

ARKit Navigation | Swift, ARKit, CoreLocation, UIKit

github.com/chriswebb09/ARKitNavigationDemo

- Built 3D AR navigation system converting 2D routes into interactive spatial waypoints.

ARKit Drone | Swift, ARKit, Multiplayer AR

github.com/chriswebb09/ARKitDrone

- Developed an augmented reality drone that users could fly around in their world.
